

All flesh is grass

All eggs are women

The instrument is also the disease

A dollar is an acre

Little old ladies die no sudden deaths

The sea is recorded on tapes

All adults are growing children

Toxic meat is the entire army

The whole is more than the sum of its parts

Vitamins

All objects are philosophies

All philosophies are wheat crop

The bible has a natural part regardless of how tall

All chickens kill a man

Interstellar is a routine dwelling

Orthodox art has an occult background

Every tendril has its power

All leaflets disturb the leaf

The butterfly and the stopwatch cover the same ground

Stars explode quietly for other organisms

All areas germinate

Energy is a naked area

Sex is the fact before

All poses are the greatest threat

A second birthday is coming

Before the meeting all present become convinced

A furor is true if it is a white blackberry
